East Cork Crane Hire Ltd.

Crane Hire

25 ton - 350 ton
All Terrain, Truck Mounted Cranes,
Mobile Tower Crane.
Fully Insured, 24 Hour Call Out Service

Equipment Hire & Sales

Block Grab and Net, Concrete Skips
Muck Skips, Man Baskets

Training Centre

Slinger/Signaller, Mobile Crane,
CSCS Standard

Crane Testing

GA1 Four year Testing
GA1 Lifting Gear Examination
GA1 12 Month Examination

Concrete Pump Hire

25 mtr. - 52 mtr., 32 mtr. Telescopic
Additional Steel & Flexi Pipe Line Available
Lines Man Service Available

Contract Lifting

Site Surveys, Method Statements
Lift Supervisors, Slingers/Signallers

Carrigtwohill, Co. Cork, Ireland.

Tel: 021 488 3304/488 2089

Ground Mats

Temporary Ground Protection and Access

The Fast and Safe Way Forward

Ground Mat, the latest innovation, leads the way for fast deployment, temporary ground protection and access over soft or sensitive ground, and up to 60 tonnes!

- Heavy duty ground protection/temporary access mat
- Fully metric 1.2m wide x 2.4m long and 14mm thick
- Weigh 36 kg; compression moulded, not extruded.
- 100% recycled or virgin polyethylene; 100% recyclable
- Unbreakable up to 80 tonnes
- Extra hand cut outs – great for offloading from trucks
- Avoids health and safety issues
- Simple and fast to install

Ground Mats are light enough for two men to handle, prevent vehicles getting bogged down and significantly reduce damage to ground, including heritage and eco-sensitive areas, avoiding the need for reinstatement. The unique 'mud dispersing' chevron grip-surface is the most effective in the market and is ideal when the weather or ground conditions turn for the worse.

Ground Mat are essential for the construction, civil engineering and ground work industries, and for providing temporary ground protection and access for outdoor leisure events. They are ruggedly designed for fast and effective use. A wide range of connection options are available for long term deployment and demanding applications such as steep or sloping terrain or very heavy or tracked plant.

Unlike many imported and other mats, Ground Mats can be connected at right angles to one another to form pads and turning areas.
